

In October 2017 Erlanger implemented “eChart”, a new electronic medical record system. This will transform the level and quality of care provided to our patients. We are pleased to offer our clinical students the opportunity to train using this state-of-the-art electronic medical record.

In order to grant access to the electronic patient record, your instructor will collect the following information:

- Full name
- Birthdate
- Full social security number
- Email
- Clinical start & end dates
- Security Question & answer
 - Where were you born? or What is your mother’s maiden name?

Once this information is entered in the system, you will receive an email with a link to eChart online learning modules. Access will be activated within 24 hours of training completion or at the designated clinical start date. Returning students will not repeat training; access will be re-activated based on the subsequent clinical start date.

We value our role in providing quality training for you, our future clinicians. We are very excited to offer the opportunity to work and learn in our eChart system.
